How Information Technology Research and Development Changed from the First to the Second Year?

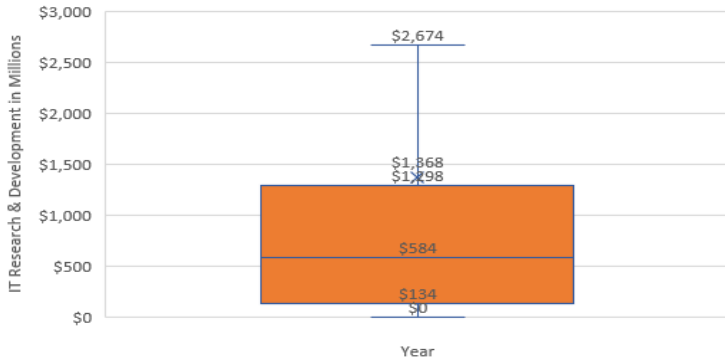

Visual Representation of First Year

These are two histogram representation of the first and second year of R&D in Information Technology sector for all companies.

The histogram representations show that the R&D mean of the second year is more than the R&D mean of the first year by more than \$100 million. That means companies start take Information Technology more serious and invest more on the development of this sector.

Visual Representation of Second Year

The mean for the R&D expenses of the first year is about \$1.2 billion and it is slightly increased in the second year to reach \$1.3 billion. However, the median for the second year is slightly less (\$584 million) than the median for the first year (\$590 million). The standard deviation for the first year is \$2.2 billion which is very much higher than the mean value of the first year (\$1.2 billion). That tells the company R&D spending in the Information Technology is scattered. Same thing happened in the second year where the standard deviation was \$2.4 billion and the mean was \$1.3 billion.

Profit and Loss Statement of ABC Company Between First to Fourth Year

We can see from the below Profit & Loss Statement the gross profit increased remarkably during the four years.

The gross profit increased by \$474 million in the second year which is 18.92% of the first year. The third year saw an increase of gross profit by 18.33% of the previous year. The fourth year registered the highest gross profit of all the years with 21.06% growth of the previous year.

The Operation Profit of the ABC company was not stable throughout the years. The Operating Profit registered \$898 million in the first year. But went down to \$782 million in the second year which is less than the first year by \$116 million. The third year registered even worst Operating Profit of \$422 million which is almost half the operating profit of the previous year. Things changed in the fourth year, with more than \$1.5 billion Operating Profit which is three times the Operating Profit of the previous year.
